

Sting Free Skin Barrier Spray

Advanced equine skin protection with next generation silicone technology

National Veterinary Services

396795	Sting Free Barrier Spray Select	200ml
396783	Sting Free Barrier Spray Select	100ml

Sting free Skin Barrier Spray

that utilises next generation silicone technology to create a protective shield against the harmful effects of body waste, enzymes, and adhesives. This barrier forms a thin, breathable film on the skin, providing protection without compromising the adhesion of any subsequent dressings.

Great to use for cuts, abrasions, scabs, bites, cracked or sore skin, mud fever and other seasonal related problems.

- ✓ Sting free, even on broken/sore skin
- ✓ Will not build up on skin/fur causing matting and irritation
- ✓ Dries quickly – apply next adhesive in seconds
- ✓ Will not cause build-up of layers
- ✓ Does not bond skin folds

Silent spray action

Designed to avoid startling patients during use.

Sprays at any angle

Possess a spray head design which creates an even spray action that allows the can to be sprayed at any angle.

Suitable for equine use

Ideal for equine cuts, abrasions, bites, cracked skin, mud fever, and seasonal issues.

Environmentally friendly

Uses environmentally friendly propellant which is not released from the can during application.
